

MATHS AND ME IN 2020

A Maths Book of Memories

By

A note to you from me Sara Tilley... (and all the other maths teachers in the whole wide world).

2020 has been a strange year for education, in this country, and all around the world. You might not be having your usual daily maths lessons but that doesn't stop maths being all around us! It doesn't stop us needing maths for our everyday life. Maths is not just about calculating number, it's also about geometry and patterns, time and money, measurement and statistics. Don't forget the problem solving and reasoning side of maths – we use this to make decisions every day! This memory booklet is for you to capture this moment in your history and to think about maths and its importance in your life now and in the future.

ME, MYSELF AND I...

Age in years:

in months:

in days:

Birth date:

Height:

Mass:

Circumference of my head:

Circumference of my wrist:

School:

Class:

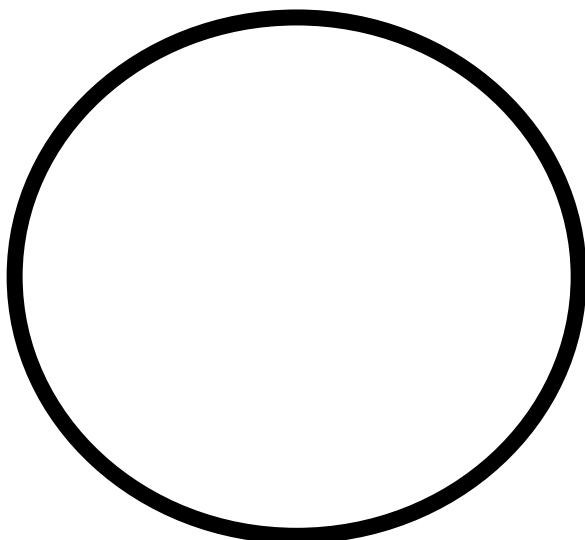

Teacher:

Headteacher:

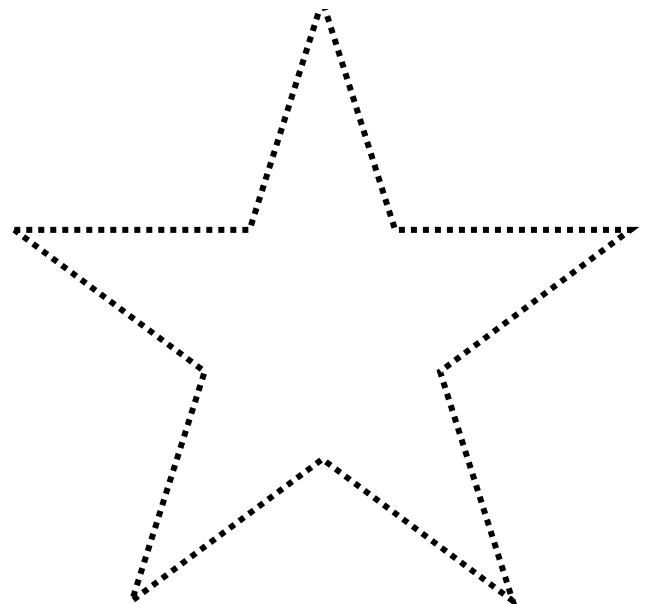

My last day in school was:

I have had _____ days off school.

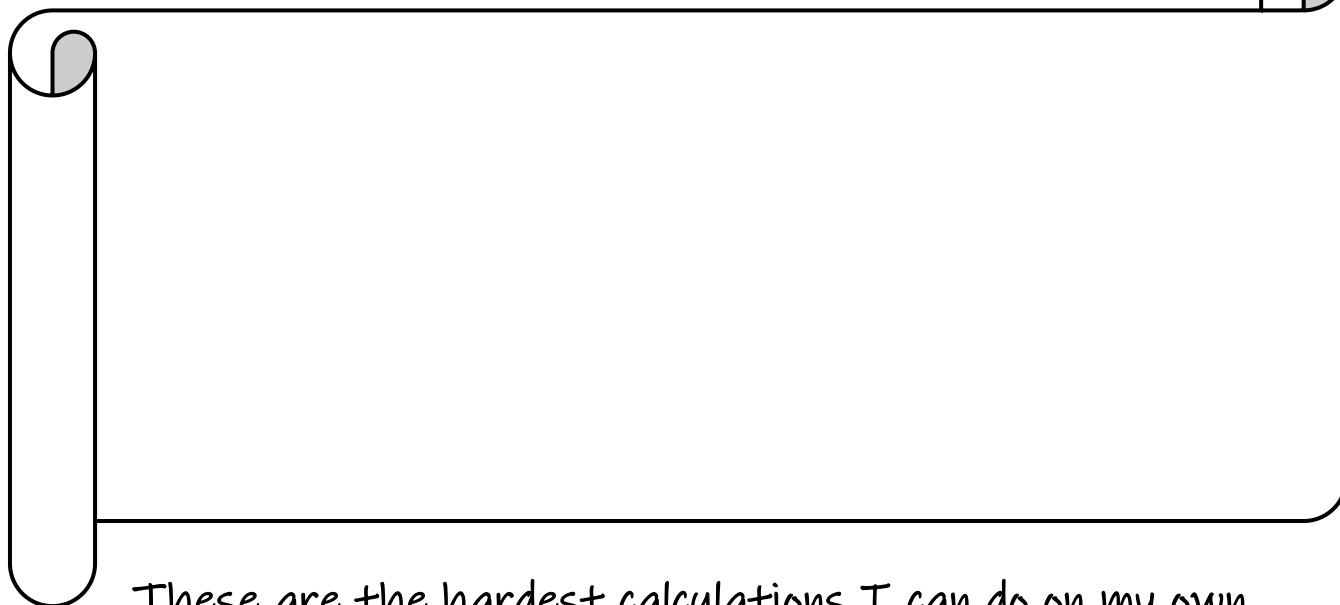

My self portrait

My favourite Number

A typical maths lesson before COVID 19...

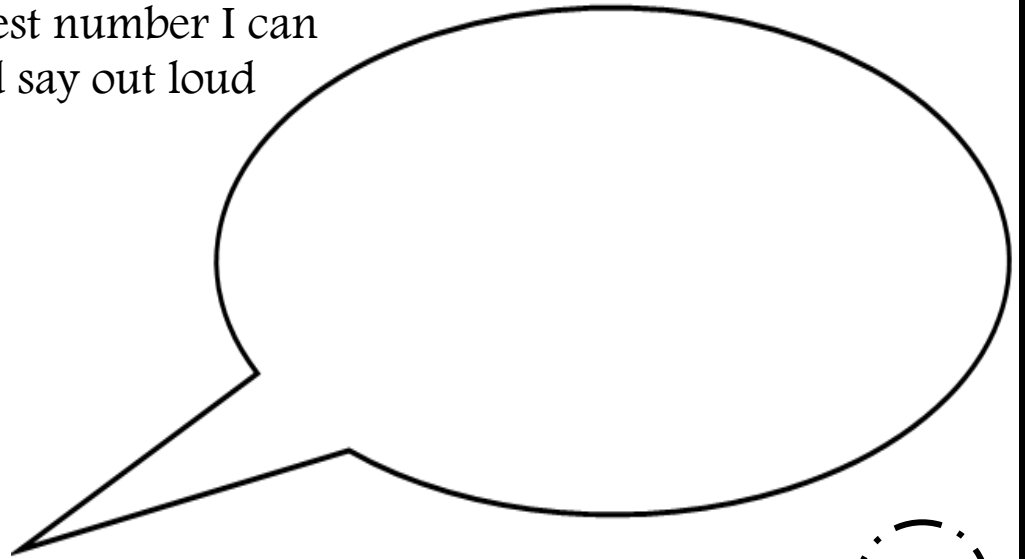

These are the hardest calculations I can do on my own...

Addition	Subtraction

Multiplication	Division

This is the biggest number I can write down and say out loud

My favourite part of maths is

In maths, I am really good at

The trickiest thing in maths is

MY FAVOURITE MATHS JOKE

A large rectangular area with a dashed border, containing three lines of cursive text for writing and a bold heading for a math joke.

Important maths facts I need to remember...

**My address and
postcode**

**Important
telephone numbers**

**Emergency numbers
and helplines**

**Birthdays and
celebrations**

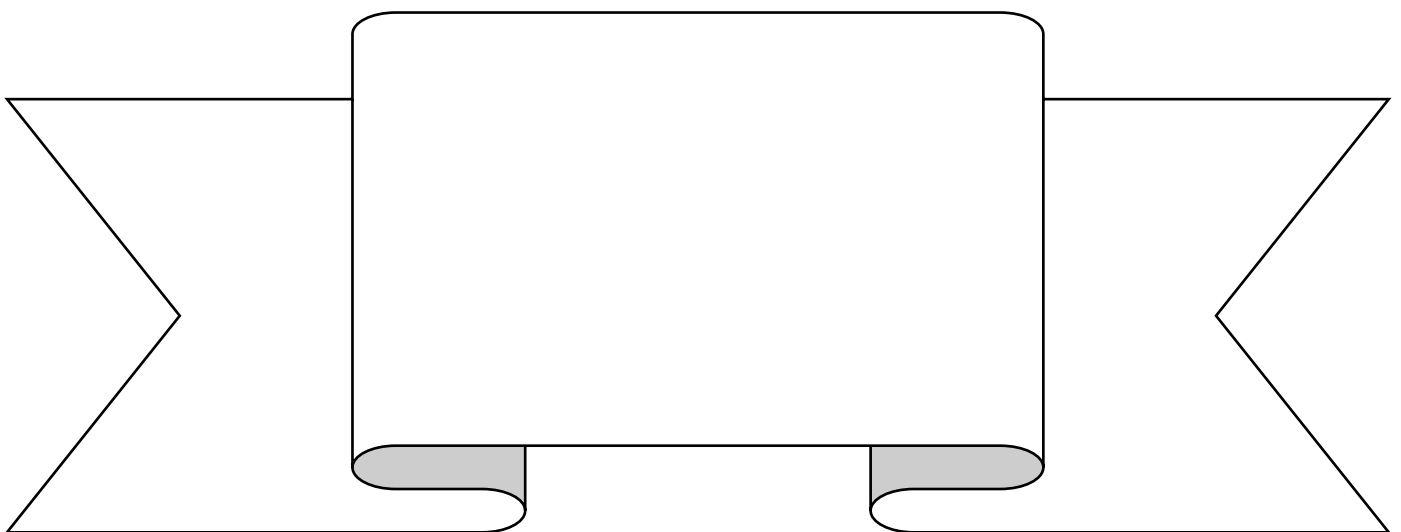

MATHS AND ART

The rainbow has been a recognised symbol of hope during COVID 19. This is my mosaic COVID rainbow made up of lots and lots of repeated shapes.

Maths and Technology

The top three maths apps I have been using for home learning:

Maths websites I have used for home learning

Maths facts about my favourite computer game...

Name of game:

Highest score:

Number of wins:

Number of trophies:

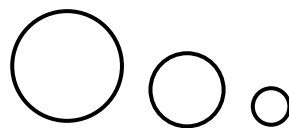

Maths I need to understand to be able to play this game well:

I estimate I have played this game _____ times.

In a week, I estimate I have spent _____ hours playing this game.

In a month, I predict I spend _____ hours playing this game.

ESTIMATION STATION

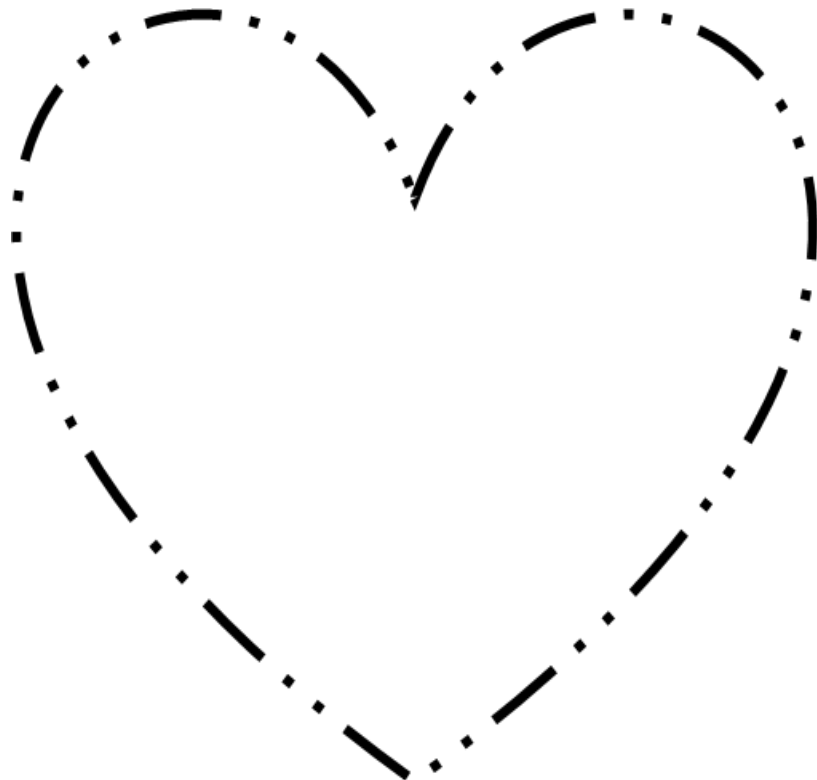

MONEY, MONEY, MONEY!

It's expensive to live in 2020. Here are some of the costs of living and my estimations for the future!

Item	Price in 2020	Price in 2030
Loaf of bread		
First class stamp		
A pint of milk		
A book by my favourite author		
My school uniform		
A cinema ticket		
My favourite sweet treat		
A family takeaway		
A computer game		
A house in my street		
An act of kindness		

Raising money during COVID 19

This is Captain Tom Moore's story and how much money he raised for the NHS during COVID 19.

**World
Record
Maths
Facts in
2020**

FASTEST 100M RUN:

HIGHEST BUILDING:

OLDEST PERSON:

FASTEST TIME TO COMPLETE A RUBIK'S CUBE:

LARGEST MATHS LESSON:

TALLEST PERSON:

RICHEST PERSON:

FASTEST LAND VEHICLE:

Big numbers in the real world - My estimations

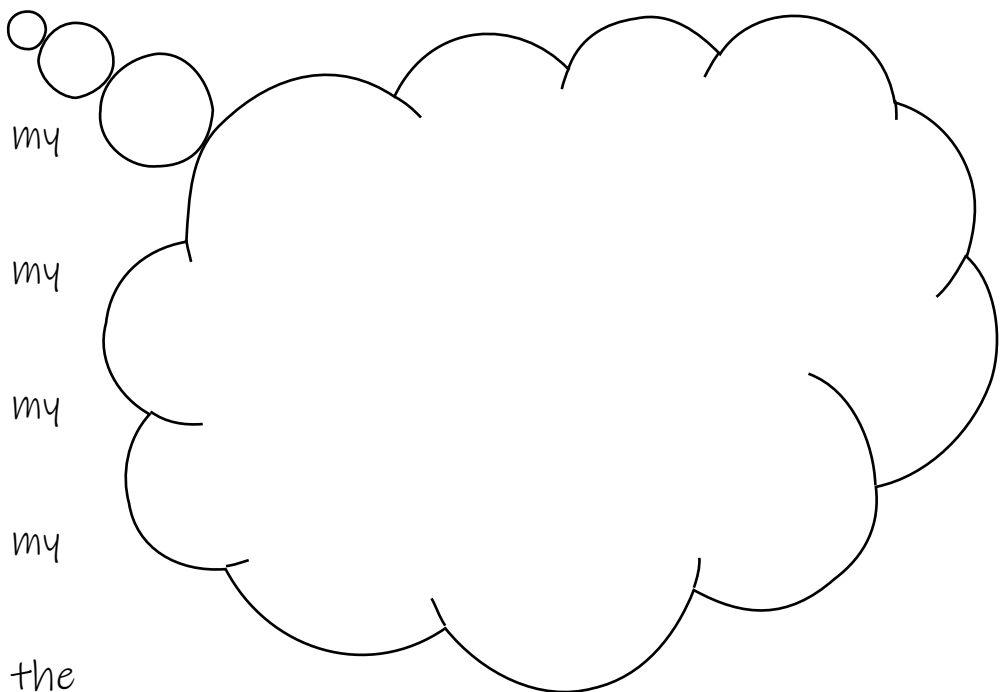

Number of people in my house:

Number of people in my street:

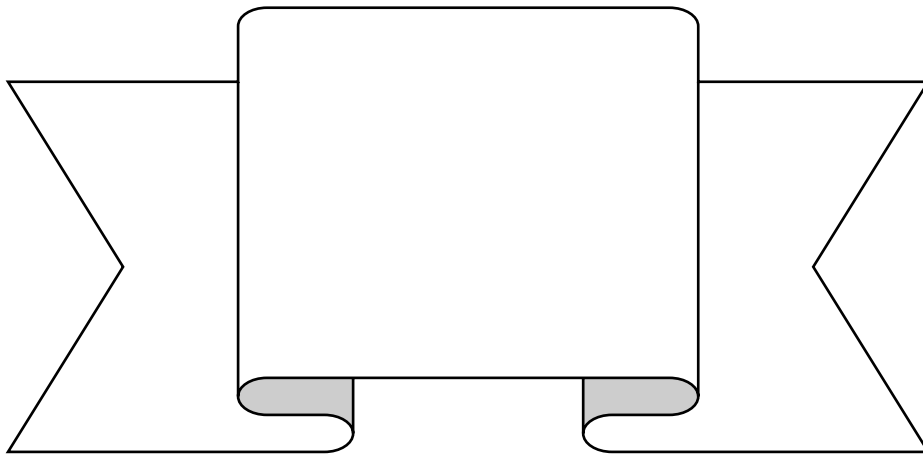

Number of people in my borough:

Number of people in my country:

Number of people in the world:

Maths is everywhere! Here is some real-life maths that I have done at home during COVID 19

If my teacher were going to give me a maths award.

It would be for...

My ambitions and dreams

The maths I will need is
