

Year 6: Week 2, Day 3

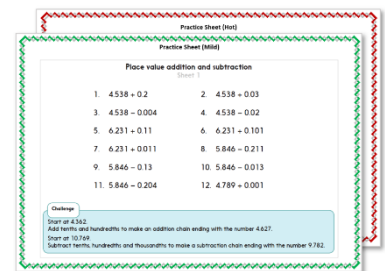

Multiply and divide fractions

Each day covers one maths topic. It should take you about 1 hour or just a little more.

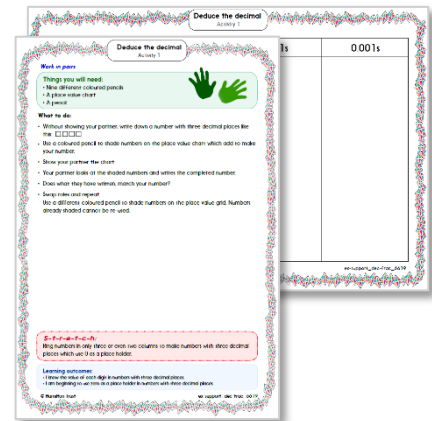

1. Start by reading through the **Learning Reminders**. They come from our *PowerPoint* slides.

2. Tackle the questions on the **Practice Sheet**. There might be a choice of either **Mild** (easier) or **Hot** (harder)! Check the answers.

3. Finding it tricky? That's OK... have a go with a grown-up at **A Bit Stuck?**

4. Have I mastered the topic? A few questions to **Check your understanding**. Fold the page to hide the answers!

Learning Reminders

Multiply pairs of fractions.

A school are growing their own fruit and vegetables.

$\frac{1}{4}$ of the plot is for fruit and $\frac{3}{4}$ of the plot is for vegetables.

If $\frac{1}{2}$ of the fruit area is for growing strawberries, what fraction of the whole plot is that?

?

$$\frac{1}{2} \times \frac{1}{4} = \frac{1}{8} \text{ strawberries}$$

Learning Reminders

Multiply pairs of fractions.

A school are growing their own fruit and vegetables.

$\frac{1}{4}$ of the plot is for fruit and $\frac{3}{4}$ of the plot is for vegetables.

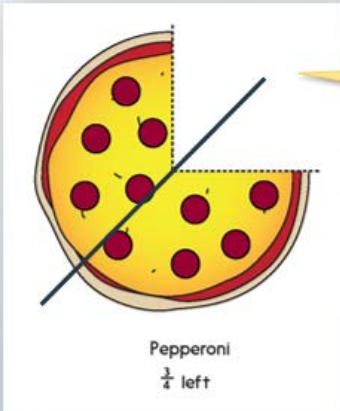

$\frac{1}{4}$ of the fruit area is for raspberries, the other $\frac{1}{4}$ is for rhubarb. What fraction of the whole plot are each of these?

We can calculate a quarter of a quarter by finding

$$\frac{1}{4} \times \frac{1}{4} = \frac{1}{16}$$

Learning Reminders

Divide fractions by whole numbers.

Two children are going to share what's left of the pepperoni pizza.

? They each have half of what's left, but what fraction of the whole pizza do they have each?

Dividing $\frac{3}{4}$ between 2 is the same as finding $\frac{1}{2}$ of $\frac{3}{4}$ ($\frac{1}{2} \times \frac{3}{4}$)
so, $\frac{3}{4} \div 2 = \frac{1}{2} \times \frac{3}{4}$.

$$\frac{3}{4} \div 2 = \frac{3}{8}$$

Divide fractions by whole numbers.

Two children are going to share what's left of the cheese and tomato pizza.

? They each have half of what's left, but what fraction of the whole pizza do they have each?

$$\frac{2}{3} \div 2 = \frac{1}{3}$$

Practice Sheet Mild

Find fractions of fractions

Calculate the fractions of these fractions for each circle. What do you notice about the denominators of your answers?

$\frac{1}{2}$ of $\frac{1}{2}$ is

$\frac{1}{3}$ of $\frac{1}{2}$ is

$\frac{1}{4}$ of $\frac{1}{2}$ is

$\frac{1}{2}$ of $\frac{1}{3}$ is

$\frac{1}{3}$ of $\frac{1}{3}$ is

$\frac{1}{4}$ of $\frac{1}{3}$ is

$\frac{1}{2}$ of $\frac{1}{4}$ is

$\frac{1}{3}$ of $\frac{1}{4}$ is

$\frac{1}{4}$ of $\frac{1}{4}$ is

Now try these:

$$\frac{1}{2} \times \frac{1}{5}$$

$$\frac{1}{2} \times \frac{1}{6}$$

$$\frac{1}{2} \times \frac{1}{10}$$

$$\frac{1}{3} \times \frac{1}{5}$$

Work in pairs

Things you will need:

- A set of shapes divided into fractions
- Coloured pencils
- A pencil

What to do:

- Quickly colour in $\frac{1}{2}$ of the circle.
- Now fold the circle in half so each half is split in half.
 $\frac{1}{2}$ of $\frac{1}{2}$ is _____.
- Quickly colour in $\frac{1}{3}$ of the square.
- Now fold the square so that each third is split in half. $\frac{1}{2}$ of $\frac{1}{3}$ is _____.
- Choose one of the rectangles.
What fraction is each part?
Quickly colour one part.
- Fold the rectangle so that each part is split in half.
Write the matching halving statement.
- Repeat for at least two more rectangles.

$\frac{1}{2}$ of $\frac{1}{2}$ is...
$\frac{1}{2}$ of $\frac{1}{3}$ is...

S-t-r-e-t-c-h:

Use folded shapes to find $\frac{1}{2}$ of $\frac{3}{8}$ and $\frac{1}{2}$ of $\frac{5}{6}$.

Learning outcomes:

- I can find half of unit fractions.
- I am beginning to find half of non-unit fractions.
